crossing the
language barrier

In today's busy and complex world it is often difficult for users of services to get their voices heard by the people and organisations with whom they are trying to communicate – especially when different languages are involved.

This 'language barrier' can lead to frustration, loss of time and worse still misunderstandings, just at the time when it is important for them to be heard clearly. It is just as frustrating for those who provide the service.

At Praxis, we understand this, which is why we have put together a special team of more than 36 interpreting and translation experts to help you and your service users to get the message across accurately, easily and fast!

Our staff are specially picked and trained. We offer the highest quality services – both written and spoken.

Our services are quick to access and available in many community languages including:

- **Albanian**
- **Amharic**
- **Arabic**
